5. Verify your email is correct—this is how you will be contacted

Promotion to a Controlled Grade (E8/E9/O4/O5/O6) is dependent on Controlled Grade Availability

SPECIALTY SUMMARY:

- IT Systems personnel can perform three primary work roles: Technical Support, Systems Administrator, and Network Operations. IT systems technicians qualified as Technical Support manage and maintain client devices and accounts as well as routine tasks on network devices and infrastructure to troubleshoot and resolve network connectivity issues. At the intermediate and advanced proficiency levels, Systems Administrators manage and maintain server operating systems and software applications. Network Operations personnel install, support, and maintain network infrastructure devices and systems. Each role requires a unique set of skills and competencies, and IT systems personnel may specialize in one or more of these work roles depending on their expertise, interests, and the position requirements. IT systems manage and perform Warfighter Communications in all environments in support of the overall requirements to survey, secure, protect, defend, preserve, design, build, operate, and extend data, networks, net-centric capabilities, and other designated systems. This Air Force Specialty Code incorporates the use of DCWF codes to tie this specialty to the framework. The DCWF was developed by the National Institute of Standards and Technology (NIST) and the DoD to establish a common lexicon and model for all cyber work. The DCWF will universalize training and education between academia, industry, and military. It will also enable talent management by ensuring the right Airmen, for the right assignment, at the right time. DCWF work roles associated with this specialty will be listed in the Career Field Education and Training Plan (CFETP).

DUTIES AND RESPONSIBILITIES:

ACTIVE GUARD RESERVE (AGR)

POSITION VACANCY ANNOUNCEMENT

- Technical Support. IT systems personnel qualified as Technical Support design, build, provision, maintain, and sustain information systems, including warfighter communications, within the Department of the Air Force (DAF). This role is responsible for deploying, sustaining, troubleshooting, and repairing standard voice, data, video network, and cryptographic client devices in fixed and deployed environments. The individual will manage client user accounts and organizational client device accounts and perform, coordinate, integrate, and supervise network design, configuration, operation, defense, restoration, and improvements.
- System Administrator. IT systems personnel qualified as a System Administrator design, build, provision, maintain, and sustain information systems, including warfighter communications, within the Department of the Air Force (DAF)... The individual will install, support, and maintain server operating systems or other computer systems and the software applications pertinent to its operation, while also ensuring current defensive mechanisms are in place. They will also respond to service outages and interruptions to network operations and administer server-based networked systems, distributed applications, network storage, messaging, and application monitoring required to provision, sustain, operate, and integrate cyber networked systems and applications in garrison and at deployed locations
- Network Operations. IT systems personnel qualified as Network Operations, design, build, provision, maintain, and sustain information systems, including warfighter communications, within the Department of the Air Force (DAF) This role is responsible for deploying, sustaining, troubleshooting, and repairing standard voice, data, and video network infrastructure systems, IP detection systems, and cryptographic equipment .The individual is also responsible for fabricating, terminating, and interconnecting wiring and associated network infrastructure devices. They will also respond to service outages and interruptions to network operations.
- Expeditionary Communications delivers cyber capabilities in austere and mobile environments. Expeditionary Communications includes all applicable statutes, but specifically datalinks, the building, operating, maintaining, securing, and sustaining of tactical and communications networks when needed to support warfighter requirements, systems employed in austere, mobile, and/or expeditionary environments, to provide command and control in support of Air and Space Force missions.
